Summary

Aspiring frontend developer with 6 months of experience using React, JavaScript, and Redux to build major aspects of user experience and user interface for client-facing landing pages. Familiar in using Bootstrap and CSS to build e-commerce sites. My hands-on work experience has allowed me to hone the development of UI updates and debugging abilities.

Personal Projects

E-commerce Web Application

- Develop an ecommerce application using React Redux with full-featured shopping cart, product reviews and ratings along with PayPal/credit card integration.
- User functionalities like view product features, search products, update user profile, view order details as well as track them. Standard checkout process (shipping, payment method, etc.) to order products.
- Admin account to handle product management. Admin can view registered user details and their orders through order details page. Mark order as delivered and can add new products through database seeder scripts.
- Custom middleware to protect routes. Implement authorization using JWT tokens.

Music Player Frontend

- Build a custom frontend interface for music player. Styled using traditional CSS, avoiding UI templates and library. Implement major aspects of styling to meet UI expectations from user.

Portfolio Website

- Responsive personal portfolio to showcase my recent work. Build using React and standard CSS practices (CSS variables, flex and grid layouts) and CTA to make it scalable.

Skills

Frontend: React | JavaScript | Redux | Redux-Toolkit | Bootstrap | CSS3 | HTML5
Backend: Node.js | Express.js | MongoDB | Rest API | Firebase | Java

Education

B.E. in Computer Engineering,	July 2013 - June 2018
Sandip Institute of Technology and Research Centre, Nashik.	60%
H.S.C	June 2011 - June 2013
Maratha Vidhya Prasarak Samaj College, Nandgaon.	65%
S.S.C	2011
Gautam Public School, Kopargaon.	88.91%

Certificates:

Frontend web development (02/2022)
React JavaScript (06/2022)
Backend web development (04/2022)
